

Early Bird

1) $775 \times 21 =$

2) $542 \div 21 =$

3) $7542 \times 17 =$

4) $5718 \div 22 =$

5) $\frac{4}{7}$ of 630 =

6) $2^3 + 3^2 =$

7) Lowest common multiple for 3 and 5?

8) $\frac{6}{7} - \frac{1}{14} =$

9) $\frac{4}{5} + \frac{6}{10} =$

10) Regular or irregular?

How do you know?

Early Bird

1) $605 \times 24 =$

2) $852 \div 28 =$

3) $5022 \times 25 =$

4) $6452 \div 26 =$

5) $\frac{3}{5}$ of 845 =

6) $1^3 + 4^2 =$

7) Lowest common multiple for 4 and 6?

8) $\frac{3}{8} - \frac{2}{16} =$

9) $\frac{4}{7} + \frac{3}{5} =$

10) Regular or irregular?

How do you know?

Early Bird

1) $884 \times 31 =$

2) $758 \div 34 =$

3) $6598 \times 43 =$

4) $6487 \div 31 =$

5) $\frac{2}{8}$ of 960 =

6) $4^3 + 10^2 =$

7) Lowest common multiple for 7 and 8?

8) $\frac{3}{9} - \frac{1}{3} =$

9) $\frac{3}{8} + \frac{7}{9} =$

10) Regular or irregular?

How do you know?

Early Bird

1) $154 \times 47 =$

2) $326 \div 22 =$

3) $2504 \times 21 =$

4) $3659 \div 22 =$

5) $\frac{2}{8}$ of 648 =

6) $1^3 + 5^2 =$

7) Lowest common multiple for 4 and 6?

8) $\frac{3}{6} - \frac{1}{3} =$

9) $\frac{3}{5} + \frac{7}{10} =$

10) Regular or irregular?

How do you know?

Early Bird

1) $226 \times 32 =$

2) $658 \div 23 =$

3) $3520 \times 23 =$

4) $5412 \div 35 =$

5) $\frac{2}{7}$ of 497 =

6) $2^3 + 5^2 =$

7) Lowest common multiple for 3 and 5?

8) $\frac{3}{5} - \frac{1}{10} =$

9) $\frac{3}{7} + \frac{7}{6} =$
